

MEASURING INSTRUCTIONS

***** For accuracy please have someone to measure you. *****

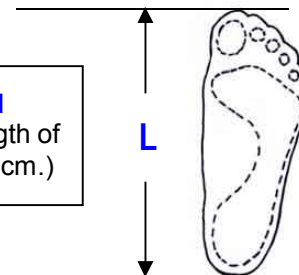

Wearing your socks, stand on a blank paper sheet, placed on the hard floor, distribute your weight on both feet. Follow the steps below and fill all the measure in the table.

1. Marking your foot outline :-

Holding a pen vertically, outline each foot according to the diagram. The outline must be joined or overlapped tracing lines. Then measure the length of the foot trace from the toe tip to the heel tip according to the diagram.

L * LENGTH
Measure the length of both feet traces (cm.)

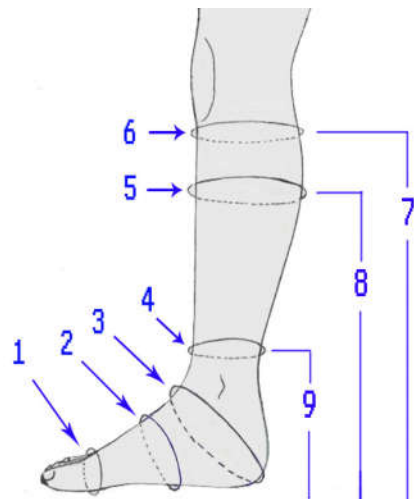

2. Measure around each foot :-

Measure each of your feet with a cloth tape circumferentially according to the positional diagram.

- 1. **BALL** : around the part where is the widest part of the foot
- 2. **INSTEP** : around the part where is the tip of the bone on the instep
- 3. **HEEL** : around the part of heel (from tip to tip of the bending point through the heel)

MORE MEASUREMENT NEEDED FOR BOOTS

- 4. **ANKLE** : around the ankle : hold the tape sufficiently easy allow room for one index finger between the tape and the ankle.
- 5. **CALF** : around the widest part of the calf : hold the tape sufficiently easy allow room for one index finger between the tape and the calf.
- 6. **TOP OF BOOT** : around the top of the boot : hold the tape sufficiently easy allow room for one index finger between the tape and the desired position.
- 7. **BOOT-HEIGHT** : the desired height position of the boot from the ground
- 8. **CALF-HEIGHT** : the high position from the ground to the **CALF**
- 9. **ANKLE-HEIGHT** : the high position from the ground to the **ANKLE**
